Our next prayer is that Shimoga may be provided with a Hospital equipped on up-to-date lines with more accommodation than is at present available for in-patients. For this purpose new buildings will have to be put up. We understand that proposals in this behalf are pending before the Government and we trust that they will receive your kind consideration.

The last matter that you refer to is the question of an up-to-date hospital at Shimoga. The question of improving the Civil Hospital at Shimoga was urged at the October Session of the Representative Assembly in 1919. Plans and estimates for providing additional accommodation were called for from the Senior Surgeon in that year. By that time, the report of the Medical Relief Committee for the whole State was received and Government ordered that the improvement of the Shimoga District Hospital should be effected so as to convert it into a well-equipped and up-to-date institution capable of serving the whole of the Malnad. Government ordered that the scheme should receive their first attention in the five years' programme chalked out by the Medical Relief Committee. The Senior Surgeon thereupon sent proposals for providing a well-equipped General Hospital and also an up-to-date Maternity with provision for the training of 12 nurses or midwives. The proposals involved an expenditure of seven lakhs of rupees for buildings, one lakh for fittings and Rs. 24,000 for equipment; and the annual maintenance charges were estimated at Rs. 75,000. I need not offer any word of explanation as to the causes which have led to the postponement of this large scheme. You will readily see that under the present condition of the State finances, the very large scheme indicated above is almost impossible of achievement. Now, what is the best alternative course under the circumstances? I fully agree that the Shimoga hospital requires expansion. I have inspected the institution this afternoon and although I was glad to note considerable internal improvements in the buildings and fittings as well as in other details, I still think that the hospital at Shimoga should be at least twice as large an institution as it is at present. Under these circumstances it appears to me that for the present if an additional in-patient ward is constructed on the pavilion system connecting the new ward with other parts of the existing building, that will provide for the immediate requirements of the district at least for the next ten years. I shall therefore suggest to the Senior Surgeon whom I expect to meet in this district during my tour, to submit a revised scheme under which provision for at least 12 additional beds in the new in-patient department may be put forward with other necessary improvements which will bring this institution up-to-date. That will necessarily be a limited scheme not involving such a large expenditure; but still it will probably require a grant of at least two lakhs of rupees. I cannot promise that you will get that money immediately in the next official year, but I shall try my best to see how much you could get in order to make a good start.

MEDICAL DEPARTMENT

CIVIL HOSPITAL, SHIMOGA.

The total number of out-patients during the last year was 35,000 and that during the last month and since, up-to-date, is 1,320. The total number of operations performed last year was 119.

There are 3 nurses, each getting Rs. 30-8-0, and 8 menials.

In the male in-patients ward, there were 23 beds on the date of inspection, the total accommodation being for 32 beds.

In the female ward, there are 12 beds and it is reported that this ward is always full.

Mr. B. K. Narayan Rao, the former medical officer in charge of this hospital, has been transferred and the new officer since appointed has not yet taken charge.

The Assistant Surgeon in charge says that the existing menial staff is insufficient and that there is need for more staff.

The Deputy Commissioner says that there is an idea of extending the Hospital building. It is reported that the need for more beds is very great. This matter has been dealt with in the Dewan's reply to the Shimoga Municipal address.

MEDICAL DEPARTMENT.

DISTRICT HOSPITAL, CHIKMAGALUR.

med
2/10/14
P. B. H.

Mr. D. S. Puttanna, District Medical and Sanitary Officer is in charge of this District Hospital. One Assistant Surgeon and one Sub-Assistant Surgeon are looking after in-patients and out-patients. The stock of medicines is reported to be sufficient. Some medicines were received two months ago on extra indents. Regular supply on the last indent has not yet been received. The in-patients ward has 24 beds. Bedding is reported to be insufficient. There are only two nurses and no ward boys. The totis look after the work that should properly appertain to the ward boys. There were 20 beds on the date of inspection.

There is a separate building in the compound of the District Office which was meant for the female ward. It is now utilised for the male patients as the female patients go to the female dispensary. Surgical and medical wards are mixed up here.

The female dispensary building constructed at a cost of Rs. 24,000 is almost ready by the side of the District Hospital. *It should be handed over to the Department soon.*

Civil Hospital, Hassan

med
4/10/14

The development of the Civil Hospital is a question that has already attracted your attention during your last visit. The building is most unsuitable. We would ourselves recommend reconstruction in a healthier locality. In any case, the improvement and development of the Civil Hospital is an urgent need.

You have made a brief reference to the development of the Civil Hospital and I understand from the notes before me that the matter has been fully gone into by the Senior Surgeon whose proposals for revised arrangements for medical aid in the Hassan town are now before Government. I can assure you that in this as well as in other matters which affect the well-being of the population in the Malnad districts in a special degree, Government will not fail to render you every assistance.

P. T. O.

MEDICAL DEPARTMENT.

CIVIL HOSPITAL, HASSAN.

Recently a drinking water well has been constructed for the use of the hospital. In the main hospital building, one room which is not meant for a ward, has been utilised as a special in-patient ward, with 3 patients. The medical officer says that only clean patients are put up here. On the date of inspection, there were 22 in-patients. The wards are full. The female ward is in the main building. There is another building constructed 8 years ago by the side of the main building which is utilized as the male ward. The medical officer says that this building cannot be utilized for female in-patients, as sometimes there may be only one or two patients and that it would not be desirable to have the female ward all by itself.

Very few improvements to the building have been done since the Dewan last visited in 1919. Sanitary cots have latterly been supplied. The infectious diseases ward is located in a separate shed behind the main building.

There is one ward cooly and 2 nurses for the female ward.

The building has small rooms altogether unsuited for a district hospital of this kind. *If the wall between the office room and the present special ward is removed, there will be one big hall which may be made the male in-patients' ward.*

This hospital has not the necessary statistics hung up for ready reference. *All medical institutions should have three years' statistics ready and hung on the wall for the use of inspecting officers.*

The average number of out-patients is 162.12. There were 223 in-patients from July up to the end of December last. The daily average is 18.12. For want of accommodation, some patients appear to have been accommodated in the musafir-khana opposite. No permission of the District Board to utilize the musafir-khana was obtained and there is no doubt that travellers will be put to much inconvenience by having the building used as a hospital ward. But the medical officer says that patients come for treatment from distant places and that they cannot be asked to go away, coming as they do from long distances, and that this practice has been in vogue for a long time without any objection being raised. The medical officer has done 525 operations during the last calendar year. There is no midwife attached to this hospital as there is a female dispensary at Hassan. There is only a relieving midwife who works in the hospital. Menial establishment of one ward cooly is said to be quite insufficient for a popular hospital like this.

Annual indent for medicines was sent 5 months ago. Stock of medicines is said to be sufficient. The hospital has 4 lbs. of quinine in stock. The main diseases are said to be just the same as everywhere else in the malnad, namely, respiratory and digestive troubles and malaria.

This hospital is more popular than the other malnad hospitals and it requires to be developed without loss of time. In fact, it has outgrown its equipment. An estimate appears to have been prepared for improvements to this building some time ago for Rs. 35,000. The Senior Surgeon has recently revised the estimate and has formulated new proposals reducing the cost and limiting it to about Rs. 10 or 11 thousand. No plans have yet been prepared according to the new proposals of the Senior Surgeon. The Senior Surgeon appears to have sent the revised proposals to the medical officer asking him to get plans prepared. *It is the Senior Surgeon that should get the plans prepared by the Executive Engineer. If the female dispensary is also shifted here, the building in which the dispensary is now located may be utilized for the Hindi Girls' School. Pending the preparation of complete plans and estimates, some re-arrangements are immediately necessary, which may perhaps be got done with about Rs. 5,000. Bath rooms are said to be absolutely necessary. It would be better if some bath rooms are put up behind the main building.*

It is true that patients coming from distant places should not be refused admission on the score of want of accommodation. If the office room and the prescribing room are put up in the verandah, which may be enclosed, the whole length of the main building may be utilized for male and female in-patients. It should provide for about 32 patients. Perhaps, it may necessitate the addition of two wings to the main building. *The Medical Department should take early steps to improve this District Hospital.*

4. Plans and estimates for the improvement of the St. Hospital building at Sheng are stated to be under preparation in the Public Works Department under instructions from the Senior Surgeon. The file on the subject was submitted to the Ld Secy some time ago.

5. Necessary additions have been ~~afforded~~^{made} to the St. Hospital building at Chikmagalur for providing more beds for in-patients and for the location of the women section in the same building. The Senior Surgeon's report regarding the removal of the Female Dispensary at the place to this building has not yet been received in this office.

8 The proposal may be accepted and detailed estimates called for from the Ch: Engr so far as Hassan is concerned. About Chickmagalur an estimate may be prepared for the Compound wall.

16 Please submit when clear.

The improvement of the Chickmagalur Hospital at Hassan are estimated to cost nearly 30,000 & the Govt Engineer wants a provision of Rs 10,000 to be made every year for the work.

17 A compound wall for Chickmagalur Hospital is an absolute necessity & the construction of a separate hospital there is also needed. The Chief Engineer may be asked to take up this work if construction of a compound wall at once & provision may be made for the later when funds permit.

Office of the Senior Surgeon, Mysore Govt.

Dated Bangalore, 25th September 1924.

No. C. 2229-10.

From

B. Mahomed Usmon Esq., L.M. & S.,

Senior Surgeon with the Government of

H. H. the Maharaja of Mysore, Bangalore.

The Secretary to the Government of His Highness
the Maharaja of Mysore, Local & Legislative Depts.
Bangalore.

Sir,

Referring to your D.O. letter No.L.2516-Med, dated 20th September 1924, I have the honor to state that the necessary additions and alterations to the District Hospital buildings at Chickmagalur are reported to be in progress and likely to be completed in a couple of months, as may be seen from letter No.802, dated 13th September 1924, from the Executive Engineer, Kadur Division, (copy enclosed.)

As regards Hassan, the question of effecting improvements to the present Hospital buildings had to be temporarily put off on account of a proposal made by the Hassan Municipal Council to shift the District Hospital to the Travellers' Bungalow. When Government passed final orders (vide your letter No.L.697-Med.5-23-98, dated 26th July 1924) rejecting the latter proposal, both the Deputy Commissioner and the President of the Hassan District Board have been addressed to move the District and Municipal Boards to reconsider the matter of effecting improvements to the existing Hospital buildings as originally proposed, and their replies are awaited. I propose visiting Hassan prior to my going to Mysore for the Dasara and discussing the matter with the local bodies and getting their final views and I hope to be able to submit a report early next month.

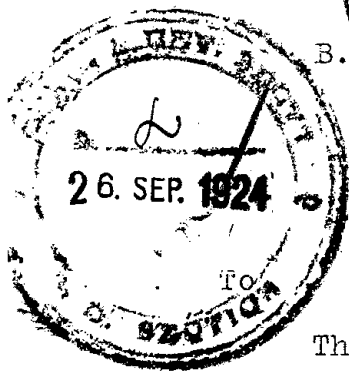

I have the honor to be,

Sir,

Your most obedient servant,

B. Mahomed Usmon
Senior Surgeon.

P.T.O.

letter No. 802 dated 13th Sep. 1924 from the Executive Engineer, Kadur Division, Chickmagalur, to the Senior Surgeon in Mysore, Bangalore.

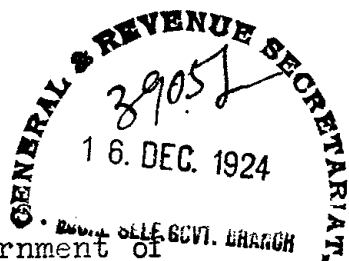

With reference to your letter No. C. 2229 -4 dated 9th Sept. 1924, enquiring what has been done in the matter of effecting certain additions to and alterations in the District Hospital at Chickmagalur for which an estimate amounting to Rs.1,660 is sanctioned, I have the honour to state that the work is in progress and will be completed in a couple of months.

"Copy."

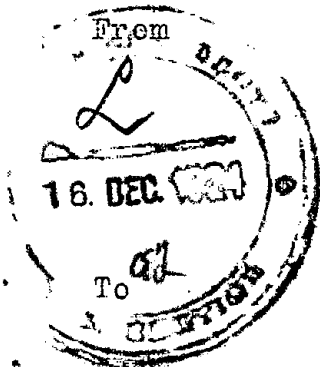

Jn P. Shewalla
Senior Surgeon

27138 Office of the Senior Surgeon in Mysore,
Bangalore, dated, 12/15 Decr. 1924.

Enc. One

B. Mahomed Usmon, Esq., L. M. & S. Senior Surgeon with the Government of H.H. the Maharaja of Mysore, Bangalore.

Ind 87-23-5-

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Local and Legislative Departments, Bangalore.

Sir,

Referring to your letter No. L. 5026, dated 4th Jan.

1924, I have the honour to submit the following report on the action taken by this office regarding the improvement of the Hassan District Hospital, in continuation of my letter No. C. 2229-10, dated 25th Sep. 1924 on the same subject.

At my visit to Hassan last month I made a careful inspection of the present hospital building and also discussed matters with the District Medical Officer and have come to the conclusion that

Improvements to main building ...	Rs.3,500	the marginally noted items of work are necessary to be taken up early, to make the institution suitable for the requirements of the district and have requested the Chief Engineer to have detailed plans and estimates prepared for the same. A copy of my letter dated 8th November 1924, to that officer is submitted for information.
Do. to present male ward	Rs. 400	
New Male ward ...	Rs.5,400	
New female ward ...	Rs.5,000	
New maternity ...	Rs.9,000	
Kitchen, Stores, etc.,	Rs.5,000	
Dead house & raingauge.	Rs.1,000	
Compound wal ...	Rs.1,860	

I have also had a talk with certain leading planters of the District who have expressed their willingness to make contributions for wards and am in communication with them on the subject. As soon as matters come to a definite settlement a complete report will be submitted.

In the meantime I request that Government in the Medical Department may kindly be moved to accept the necessity for an expenditure of about Rs.31,000/- and to arrange with the Public Works Department to provide a sum of Rs.10,000 annually for the next three years in their budget for this work.

I have the honour to be,

Sir,

Your most obedient servant,

W. H. M. M. M.

Senior Surgeon.

ASN.

Letter No. 2229 dated 8th November 1924 from the Senior Surgeon in Mysore, to the Chief Engineer of Mysore, Bangalore.

In returning site plan showing the improvements to the District Hospital, Hassan, together with the list showing the cost of each of the items of work proposed to be undertaken, I have the honour to state that after careful consideration of all the requirements I am of the opinion that the present main building is not suitable for ward accommodation as the rooms are 16 feet wide and as such, cannot hold two rows of cots, $6\frac{1}{2}$ feet long leaving at least $1\frac{1}{2}$ ft. space between the wall and four feet space between the two rows to allow sufficient space for the doctors, Nurses, etc., to move about freely and to accommodate the ward table etc., Under the circumstances, the present building will have to be made to hold the whole of the male and the female out-patient departments, and new wards will have to be constructed.

I agree that the following items are necessary, out of the old list:-

1. alterations and additions to main building	Rs. 3,500	-
2. Do. Do existing maleward	Rs. 400	-
3. New male ward for six beds	...	5,400 -
4. A new female ward	...	5,000 -
5. Combined kitchen, Store room etc.	...	5,000 -
6. A new Maternity	...	9,000 -
7. New dead house and new raingauge	...	1,090
8. Compound wall	...	1,860 -

T o t a l ... Rs. 31,250.

The construction of the contagious diseases ward and of corridors may be given up for the present.

I request that you will be pleased to get up detailed plans and estimates for the above works to enable me to obtain the sanction of Government in the administrative department, both for the plan and estimate and for making annual allotment of at least Rs. 10,000/- for this work till it is completed.

To

Ind 87-23-6

The Secretary to the Government of His Highness
the Maharaja of Mysore, Local & Legislative Depts
Bangalore.

SIR,

905

With reference to your letter No.L.5026-Med., dated
4th January 1924, and in continuation of my letter No.C.2229-13
of 23-24 of this date, I have the honor to submit the following for
the early orders of Government in connection with the im-
provement of the Chickmagalur District Hospital.

I have carefully inspected the hospital at my re-
cent visit and find that the present operation theatre is
too small to admit of easy and convenient movement of the
operator and his assistants around the operation table,
with the dressing and instrument stand, etc. Moreover, the
high basement of the building and its close proximity to
the public road renders it visible to passers by who can
see every thing going on in the theatre. The construction
of a sufficiently spacious theatre is a necessity that
cannot be postponed. When the new operation theatre is com-
plete, the present theatre could be used as a special ward
for Indians, there being no such ward at present.

In the absence of a compound wall it becomes almost
impossible to keep the hospital premises clean and tidy. I

am therefore addressing the Chief Engineer of Mysore to have plans and estimates prepared for the above items of improvement to the Hospital and request that Government may also kindly issue necessary instructions in the matter at an early date.

I have the honor to be

Sir,

Your most obedient servant,

M. S. Rao

Senior Surgeon.
